

TALLGRASS ORTHOPEDIC & SPORTS MEDICINE

DISCHARGE INSTRUCTIONS FOR FOOT SURGERY

1. Keep your leg elevated on at least 2-3 pillows. To avoid pressure behind the knee, never place a pillow under the back of the knee. Keep ice on the operative foot/ankle as much as you can tolerate for the first 2-3 days following surgery. This will help decrease the swelling in your foot and ankle and also help with discomfort. Never put ice directly on the skin.
2. Wiggle your toes and ankle (if possible) hourly while awake until seen by your surgeon. This will circulate the blood from your toes to your heart and help prevent blood clots.
3. Unless your doctor has said otherwise, you will be weight bearing as tolerated, however you will be sore the evening of surgery and may require crutches, cane, or walker for stability.
4. Take your pain pills as prescribed, but remember, narcotics can make you sleepy, nauseated or constipated so take them with plenty of food and water. You may take a mild laxative or a stool softener, such as Colace, as needed. No alcoholic beverages while taking pain medications.
 - You may take Ibuprofen 400-600mg every 4-6 hours as needed for pain in addition to your prescription.
 - You may **NOT** take any additional: Tylenol(Acetaminophen) Motrin(Ibuprofen, Advil, Aleve)
 - Your anesthesiologist recommends you take Bonine(Meclizine) 25mg (for nausea) one tablet at bedtime tonight and then every 12 hours while you are taking your prescription pain medication. You will not need a prescription, please ask your pharmacist.
5. If you have a post-op shoe on, it is to be worn at all times when standing or walking. You may remove the shoe when lying down.
6. ___ day(s) after surgery, you may remove the ace wrap and dressings. If your incision is dry you may shower and apply band-aids as needed. If the incisions are draining, cover the incision with a waterproof dressing before showering. You do not have to put a dressing over the incisions if they are not draining after the two days.
 - Do **NOT** remove your dressing. Keep the dressing clean and dry until your follow up appointment. Cover dressing with a waterproof dressing before showering.
7. May resume home medications as directed by physician. Diet as tolerated. No spicy or greasy foods recommended the day of surgery.
8. Your follow up appointment has been scheduled with Dr. _____
on _____ at TALLGRASS or 29TH & URISH CLINIC

CALL YOUR PHYSICIAN'S OFFICE AT **233-7491** IF YOU HAVE ANY OF THE FOLLOWING:

1. Pain not controlled with pain medication
